Career Objective

Motivated and passionate Computer Science Engineering student seeking to apply technical and analytical skills in software development. Committed to continuous learning, teamwork, and delivering efficient, scalable, and sustainable solutions.

Profile Summary

Detail-oriented aspiring full stack developer with strong knowledge in Data Structures, Algorithms, and Web Development. Hands-on experience building full-stack applications using Python, React, Node.js, and MySQL. Skilled in problem solving and collaborative software development.

Full Stack Skills Summary

- **Frontend:** React, HTML, CSS, JavaScript
- **Backend:** Node.js, Express.js, Flask
- **Databases:** MySQL, MongoDB
- **Tools:** Git, GitHub, VS Code, Postman

Technical Skills

- **Languages:** C, Java, Python, JavaScript
- **Web:** HTML5, CSS3, React, Node.js, Express, REST APIs
- **Databases / Querying:** MySQL, (familiar with MongoDB)
- **Tools / Platforms:** Git, GitHub, VS Code, Eclipse
- **Core Subjects:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Education

Bachelor of Technology — Computer Science Engineering 2022 – 2026
J. B. Institute of Engineering & Technology (JBLET), Hyderabad
Jawaharlal Nehru Technological University, Hyderabad
CGPA: 7.4 / 10

Intermediate (MPC) 2020 – 2022
Prathibha Junior College, Mahbubnagar
Percentage: 90.7%

Experience

Software Development Intern Hexart.in, Mehdiapatnam, Hyderabad
Duration: 09/06/2025 – 09/10/2025

- Collaborated with a cross-functional team to design and develop EcoScan, a sustainability-focused application.

- Designed and implemented backend services using Flask and Python; created RESTful APIs for data ingestion and reporting.
- Performed environmental data analysis and developed pipelines to preprocess and store sensor/user data.
- Optimized MySQL queries and schema design to improve application response times and page load performance.
- Participated in code reviews, unit testing, debugging, and iterative feature improvements.
- Assisted in frontend integration (HTML/CSS/JS) and responsive UI adjustments.

Key Projects

EcoScan — Smart Waste Classification & NGO Linkage

Tech Used: Python, Flask, MySQL, HTML, CSS, JavaScript, ML (classification models)

- Built a full-stack ML-enabled waste classification web app achieving ~92% accuracy on test data.
- Designed REST APIs for uploading images/data and returning classification results and recommendations.
- Optimized SQL queries and indexing strategy to reduce page load time and speed up report generation.
- Implemented responsive frontend interfaces for users and admin dashboards (reports, logs, NGO linkage).

CO₂ Emission Calculator — Vehicle Carbon Tracking App

Tech Used: Python, Flask, JavaScript, Data Visualization Libraries (matplotlib/Plotly)

- Implemented a tool to estimate vehicle CO₂ emissions and provide actionable suggestions to reduce carbon output.
- Integrated visualization dashboards to display emission trends and comparisons.
- Improved frontend UX for input forms and dynamic result rendering.

Certifications

- Full Stack Java — International School of Management
- Full Stack Python — GeeksforGeeks
- Java Programming — NPTEL
- Web Development Bootcamp — Udemy
- Hackathon Participant — JBIET

Achievements & Strengths

- Strong analytical and decision-making skills
- Excellent communication and presentation abilities
- Quick learner; adaptable to new environments and technologies
- Highly motivated and team-oriented
